Anubhav Mishra

Full Stack Developer | Android Engineer | Computer Science Graduate

Shahjahanpur, Uttar Pradesh, India | anubhavm1234@gmail.com | +91 (available on request)
GitHub: github.com/Anubhav-developr | LinkedIn: linkedin.com/in/anubhav-mishra | Portfolio: portfolio-website-anubhavdeveloprs-projects.vercel.app

Professional Summary

Results-driven B.Tech Computer Science and Engineering graduate with hands-on experience building Android applications, full-stack web products, Firebase-backed systems, machine learning experiments, and developer utilities. Strong foundation in Java, JavaScript, TypeScript, Python, clean architecture, responsive UX, databases, APIs, and algorithmic problem solving. Currently serving as a Gramin Dak Sevak while shipping practical software projects with a focus on reliability, clarity, and user value.

Experience

Gramin Dak Sevak (GDS) | Department of Posts, India Post | Feb 2024 - Present
Manage daily postal operations, customer service, financial services, savings-account workflows, and citizen-facing processes in Shahjahanpur. Apply operational accuracy, record discipline, and customer communication in a public-service environment.

Freelance Android and Web Developer | Independent / Remote | 2022 - Present
Design and develop Android and web applications from concept through deployment-ready delivery, with practical experience in clean architecture, responsive interfaces, Firebase ecosystems, local persistence, APIs, and product-focused UX.

Education and Achievements

B.Tech - Computer Science and Engineering | Rajkiya Engineering College Sonbhadra (REC Sonbhadra) | 2023
CodeChef Global Rank 24 | April Long Two 2022, Division 4 rated contest

Government Service | Secured Gramin Dak Sevak role at the Department of Posts in February 2024

Technical Skills

Languages: Java, JavaScript, TypeScript, HTML5, CSS3, Python, C++

Frameworks and Platforms: React, React Native, Next.js, Android SDK, Node.js, Tailwind CSS

Data and Backend: Firebase Realtime Database, Cloud Firestore, SQLite, Room, MySQL, REST APIs

Architecture and Tools: MVVM, Hilt Dependency Injection, WorkManager, WebSockets, Git, GitHub, Android Studio, VS Code, Jupyter Notebook

Computer Science: Compiler Design, Lexical Analysis, Parsing, AST, Minimax AI, Alpha-Beta Pruning, Machine Learning Regression

Selected Projects

PostPath | JavaScript, HTML, CSS, Web UX
Postal workflow project focused on clearer service journeys, practical information, and accessible public-service interactions.

System Health Monitor | Node.js, JavaScript, CPU and Memory Metrics
Runtime observability utility that tracks CPU and memory health, configurable thresholds, sampling, and overload conditions.

JEE to IIT | JavaScript, HTML, CSS, Education UX
Exam-preparation platform that helps JEE aspirants structure preparation, discover guidance, and stay oriented toward IIT goals.

JEE to IIT App | Android, Java, Mobile UI
Mobile learning companion designed for focused access to preparation content, readable study flows, and repeatable sessions.

DigiPin Explorer | JavaScript, Maps, Geolocation
Interactive exploration of India's DigiPin digital-addressing concept through location grids, map-oriented UX, and precise discovery.

House Price Predictor ML | Python, Pandas, Scikit-learn, Regression
Applied machine-learning workflow covering housing features, tabular data preparation, regression training, and price prediction.

ExamPulse | Java, Android, MVVM, Room, Hilt, WorkManager
Production-ready offline-first Android quiz and exam-preparation app with analytics, background sync, and Lottie animations.

Post Office Account Management System | Python, MySQL, Tkinter
Finance application for deposits, customer records, balances, transaction history, account ledger flows, and reporting.

Anubhav Mishra

Selected Projects and Engineering Portfolio

Continued project work | github.com/Anubhav-developr

Selected Projects - Continued

Tic-Tac-Toe Minimax AI | Python, C++, Minimax, Alpha-Beta Pruning
AI-powered game exploring adversarial search trees, pruning efficiency, evaluation heuristics, and strategic move selection.

Custom Language Interpreter | C++, Lexer, Parser, AST
Compiler-design project covering tokenization, grammar handling, AST construction, and execution-ready interpreter structure.

ClipboardMig | Android, Chrome Extension, Firebase, JavaScript
Real-time phone-to-PC clipboard synchronization connecting mobile and browser clients through a Firebase-backed pipeline.

Invofly | React Native, PDF Export, Local Storage
Cross-platform invoice generator with local persistence, multi-currency support, PDF export, and seamless sharing.

OrbitCast Nova Lite | Android, NASA API, ISRO API, PDF Generation
Weather and satellite application combining live space content, multi-day forecasts, satellite imagery, and on-device reports.

PeacePages | Java, MVVM, Firebase, Firestore, Room
Mindfulness and journaling app with Firebase authentication, Firestore sync, offline Room caching, and daily reflection flows.

Premium Portfolio Website | Next.js, TypeScript, Tailwind CSS, Framer Motion
Cinematic portfolio with responsive motion, project-specific visual systems, theme switching, performance-focused loading, and accessible navigation.

CofWah - COVID-19 Awareness Platform | Next.js, TypeScript, Tailwind CSS, CoWIN API
Hindi-first public-health platform for myth-busting, verified healthcare information, safety practices, and vaccination resource discovery.

REC Sonbhadra - Official College Website | Next.js, TypeScript, Tailwind CSS
Contribution to a public-facing institutional platform covering academic information, departments, notices, facilities, and placement content.

CocamS-K - Browser Camera Toolkit | HTML, CSS, JavaScript, WebRTC, File API
Browser media experiment exploring webcam access, screen capture, recording workflows, and native media APIs.

PIXEy-EDITOR - Browser Pixel Art Editor | JavaScript, HTML5 Canvas API, CSS
Canvas-based creative tool with freehand drawing, rectangle, fill, color-pick, undo history, and image import/export.

CodeChef User Finder | HTML, CSS, JavaScript
Lightweight client-side utility that routes a CodeChef handle directly to the matching profile page.
